

PDS provides cast urethane parts created from RTV silicone rubber molds. Urethane castings and silicone rubber molds provide a cost-effective and speedy way to emulate injection molded plastic parts without the high price of permanent tooling.

WE TAKE CAST URETHANE TO A NEW LEVEL

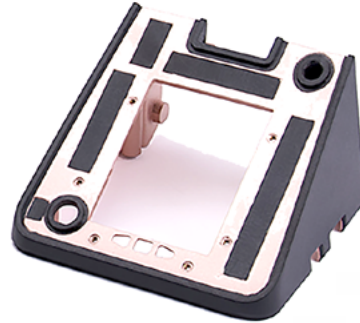

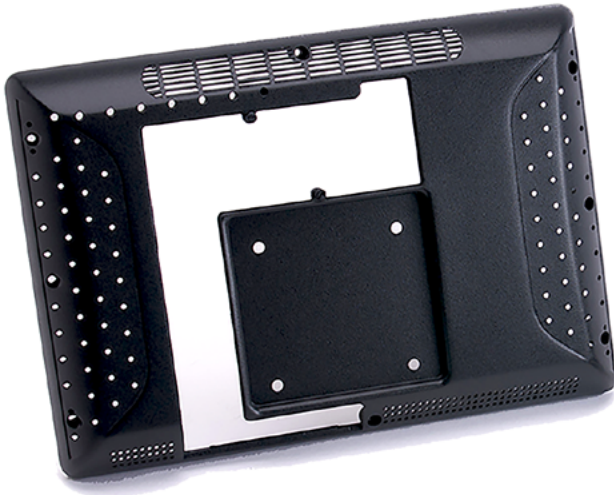

- ◆ Large parts where tooling costs are prohibitive
- ◆ Finishing
 - Cosmetic painting for high end looks
 - Decorative painting
 - Two color painting
 - EMI/RFI shielding
- ◆ Wide range of materials to meet specific mechanical requirements

- ◆ Parts in days
- ◆ Complex shapes
- ◆ Little or no draft
- ◆ Circuitry encapsulation
- ◆ Secondary machining

WHAT MAKES US DIFFERENT

- ◆ Early technical reviews
- ◆ Production quality prototypes
- ◆ ISO 9001 production guidelines
- ◆ In-house paint facility
- ◆ EMI/RFI shielding

- ◆ Parts in days
- ◆ Large sizes up to 72"
- ◆ Cast in color
- ◆ Soft durometer overmolding
- ◆ UL V0 rated materials

History & About Us

Founded in 2000, PDS is an ISO 9001:2008 certified, aggressive, fast-growing and technology driven manufacturing company loyal to its founding principles of quality, value and service.

PDS is a full service facility with capabilities for production of CNC milling and turning, prototype machining and cast urethane parts. We also offer an in house paint facility, light mechanical assembly and ship-to-stock programs.

Our company has been supplying aerospace, medical, defense, consumer goods, automotive and other OEM manufacturers with competitively priced, on time, high quality parts for years.

Markets Served

- ◆ Medical
- ◆ Military
- ◆ Consumer Goods
- ◆ Aerospace
- ◆ Industrial
